

**AMPCO** introduces  
our new line of . . .

## **CLEAR, FACTORY FINISHED DOORS**

Our doors are bonded with a hot pressed 2-ply face veneer (5-ply door) and pre-finished edge banding for a seamless, solid appearance. UV technology application ensures chemicals catalyze and instantly cure, hardening the materials for a superior and durable veneer door.

### **FEATURES**

- WDMA TR6 (UV cured catalyzed polyurethane) or TR8 (UV cured acrylic polyester)
- Meets or exceeds AWI Section 9 and WDMA I.S. 1A-11 specifications
- Standard veneer matched for a seamless look
- Environmentally safe UV curing process
- Superior impact resistance
- Lifetime warranty

AMPCO clear, factory finished veneer doors arrive **ready for installation** and **cost less** than field-applied finished doors. All stocked veneers are standard, A-grade, running book match available in all specified wood veneers and most cores.
