date projectname attn from fax email phone 3/8/17 Al Sabah Hospital Raul

Viewer: Clear plastic window allows a constant fluid level check.

Concealed Mounting Plate: Fabricated of heavy gauge stainless steel. Filler Cap: Fabricated of stainless steel, hinged to allow easy servicing, secured with special key that creates a vandal resistant dispenser.

Overall Size: 4 3/4"W x 8 1/4"H x 3 3/4"D (wall to valve)

121mm x 210mm x 95mm

Capacity: 40 oz.

Recommend type soaps without chloric solutions for proper operation.

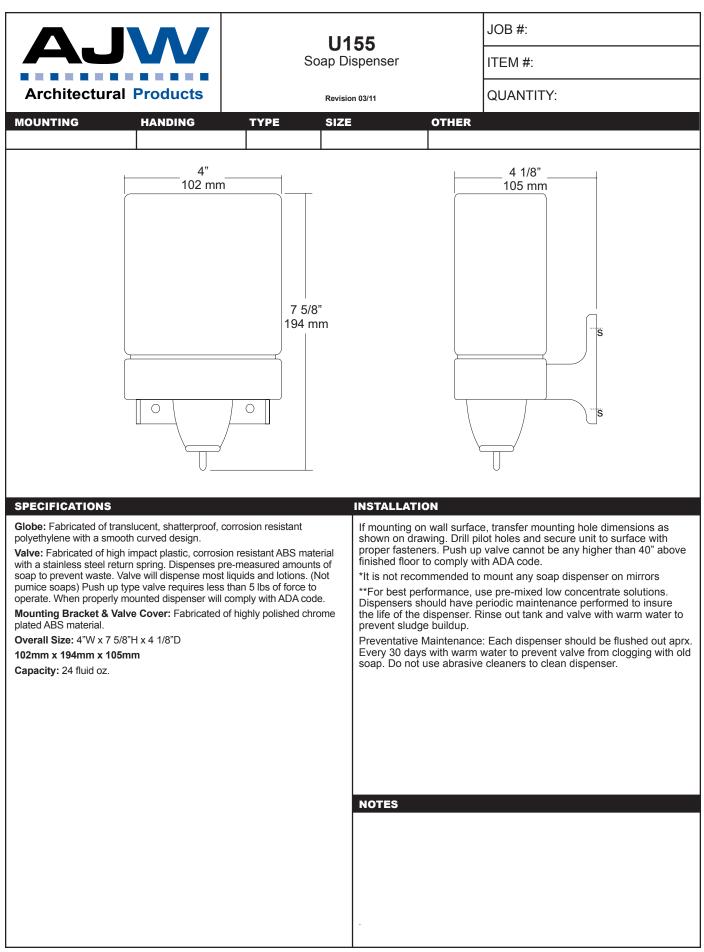

secure with special key. Test valve for proper operation.

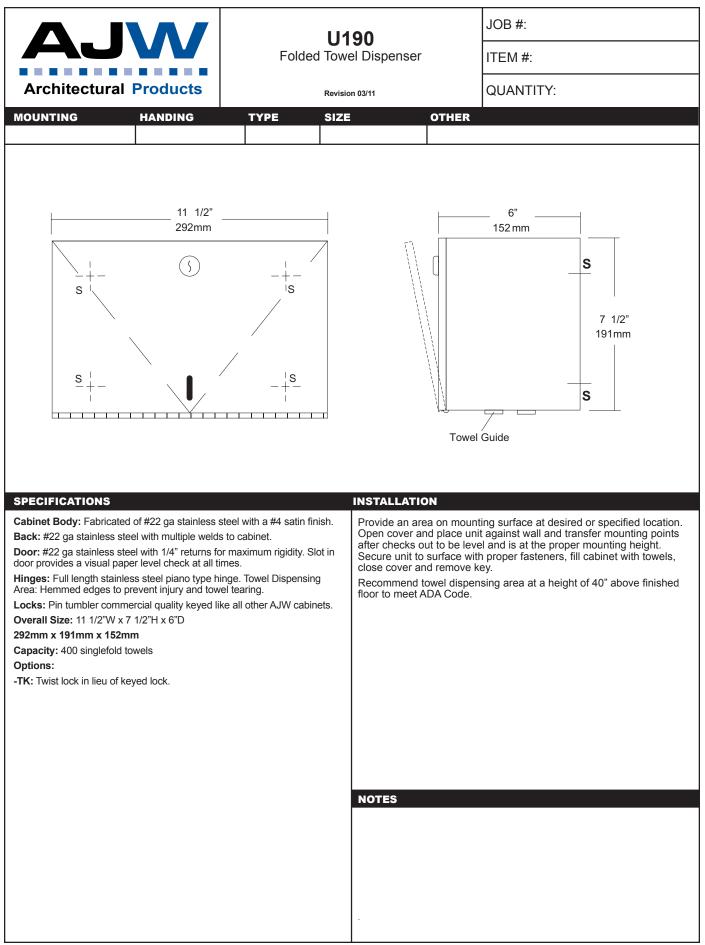

*It is not recommended to mount any soap dispenser on mirrors

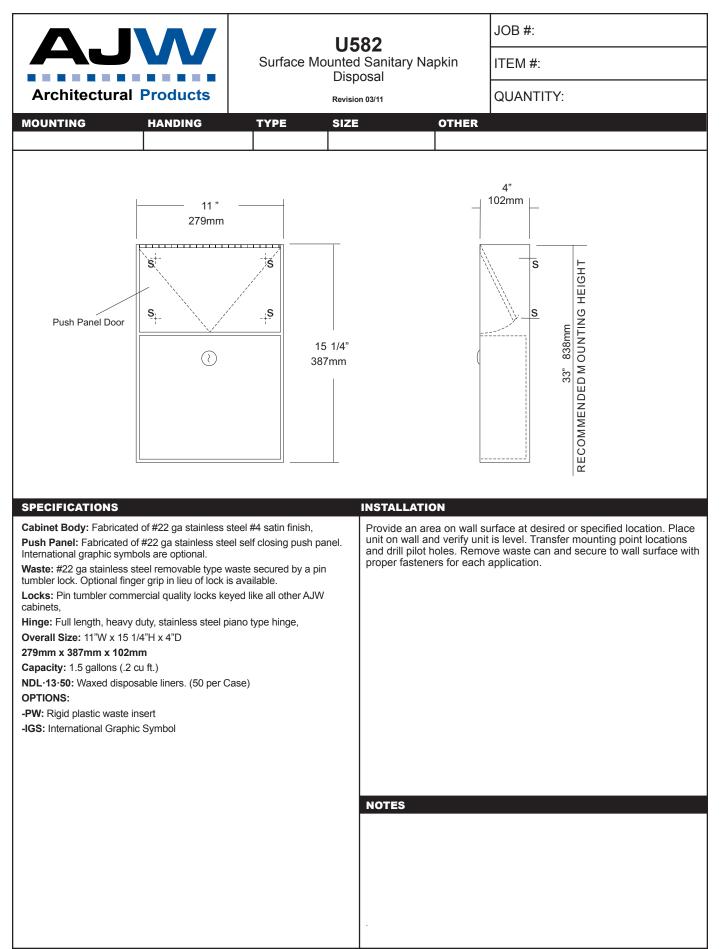

**For best performance, use pre-mixed low concentrate solutions. Dispensers should have periodic maintenance performed to insure the life dispenser. Rinse out globe and valve with warm water to avoid sludge buildup.

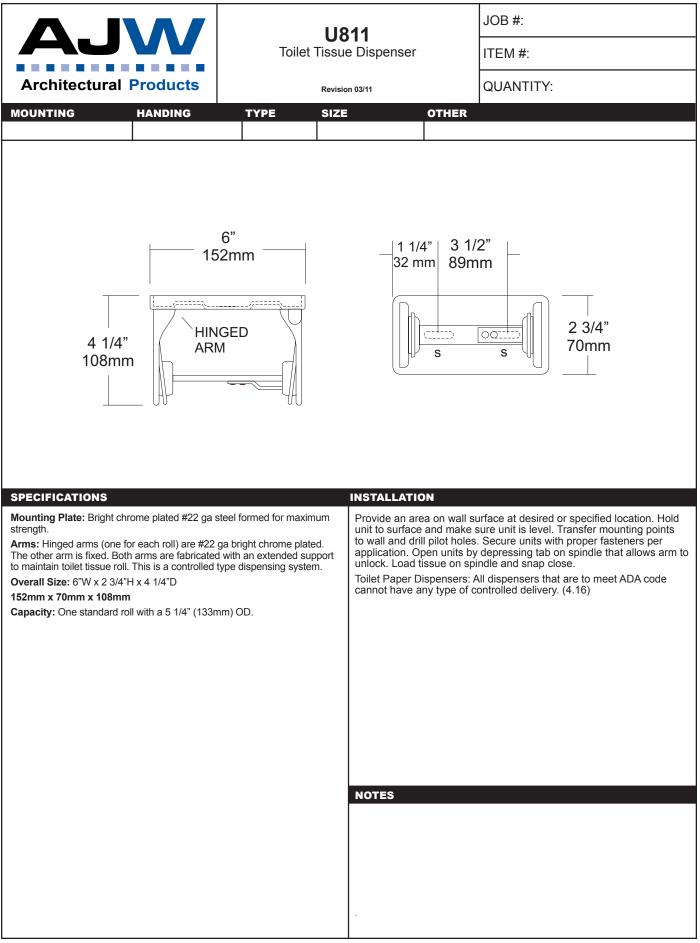

Preventative Maintenance: Each dispenser should be flushed out aprx. Every 30 days with warm water to prevent valve from clogging with old soap. Do not use abrasive cleaners to clean dispenser.

NOTES

Tubing: Fabricated of #18 gauge stainless steel with a #4 satin finish. **Main Frame:** Fabricated of #18 gauge stainless steel, with satin finish, 1

1/4" square tubing with capped ends.

Under Slung Supports: Fabricated of satin finish stainless steel tubing welded to framing.

Flanges: #11 gauge steel satin finish (3" O.D.) with four (4) exposed mounting points.

Support Legs: Four (4) support legs are fabricated of #18 gauge stainless steel tubing with anti-slip support feet. Feet are adjustable by means of a threaded rod that allows minor adjustments for seat to be leveled due to a slope of the shower base.

Shower Seat: When mounted properly seat will be 18" above finished floor with a 1/2" adjustability to level seat. Wall / floor design provides maximum support and equal distribution of weight. Seat has been tested to maintain 1300 lbs of static load. Handing of seat can be changed in the field.

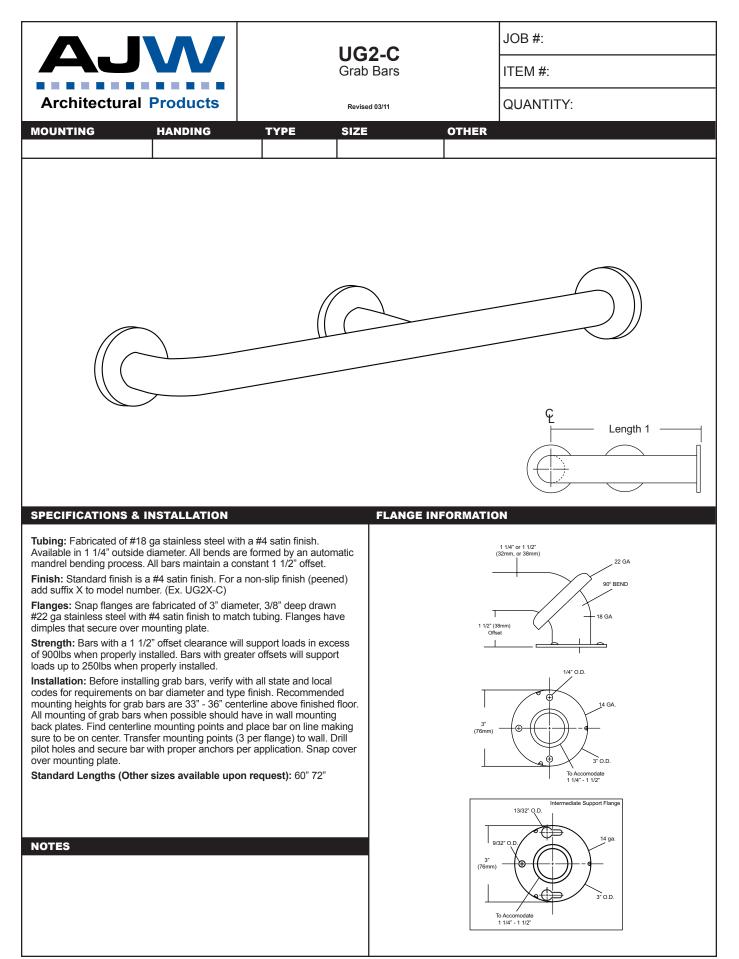

Overall Size: 32"W x 20 1/4"D (Seating Area) 813mm x 514mm

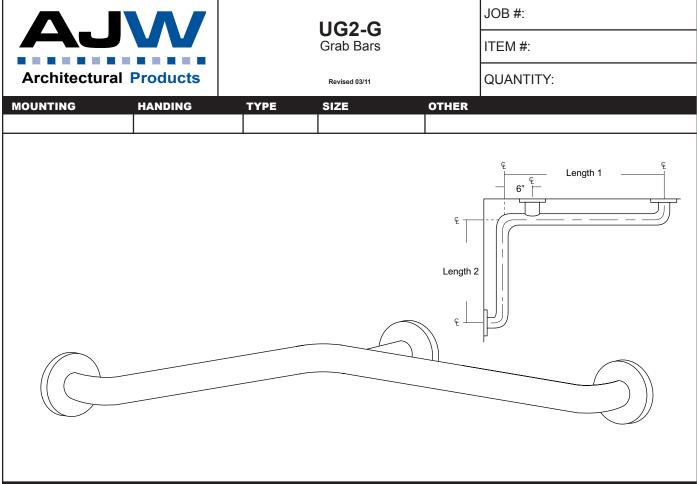

To comply with ADA code, seat (bench) should be mounted at a height 17" – 19" above the finished floor. Check all state and local codes for building requirements. Seat when mounted properly will have a height of 18" above finished floor. Place unit in the extended position at desired or specified location making sure the space between the wall and seating area is not greater than 1 1/2" and transfer mounting point locations to mounting surface and drill pilot holes. Snugly secure to surface with proper anchoring and check bench for level. If seat is not level, adjust accordingly with the threaded non-slip feat. Fold seat up to check travel of seat. Seat will remain in the retracted position when installed properly. Lower the seat to verify full leg extension, check seat to be level and finish securing fasteners.

SPECIFICATIONS & INSTALLATION

FLANGE INFORMATION

Tubing: Fabricated of #18 ga stainless steel with a #4 satin finish. Available in 1 1/4" outside diameter. All bends are formed by an automatic mandrel bending process. All bars maintain a constant 1 1/2" offset.

Finish: Standard finish is a #4 satin finish. For a non-slip finish (peened) add suffix X to model number. (Ex. UG2X-G)

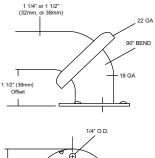

Flanges: Snap flanges are fabricated of 3" diameter, 3/8" deep drawn #22 ga stainless steel with #4 satin finish to match tubing. Flanges have dimples that secure over mounting plate.

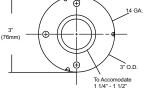

Strength: Bars with a 1 1/2" offset clearance will support loads in excess of 900lbs when properly installed. Bars with greater offsets will support loads up to 250lbs when properly installed.

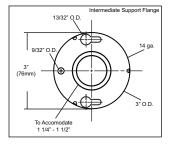

Installation: Before installing grab bars, verify with all state and local codes for requirements on bar diameter and type finish. Recommended mounting heights for grab bars are 33" - 36" centerline above finished floor. All mounting of grab bars when possible should have in wall mounting back plates. Find centerline mounting points and place bar on line making sure to be on center. Transfer mounting points (3 per flange) to wall. Drill pilot holes and secure bar with proper anchors per application. Snap cover over mounting plate.

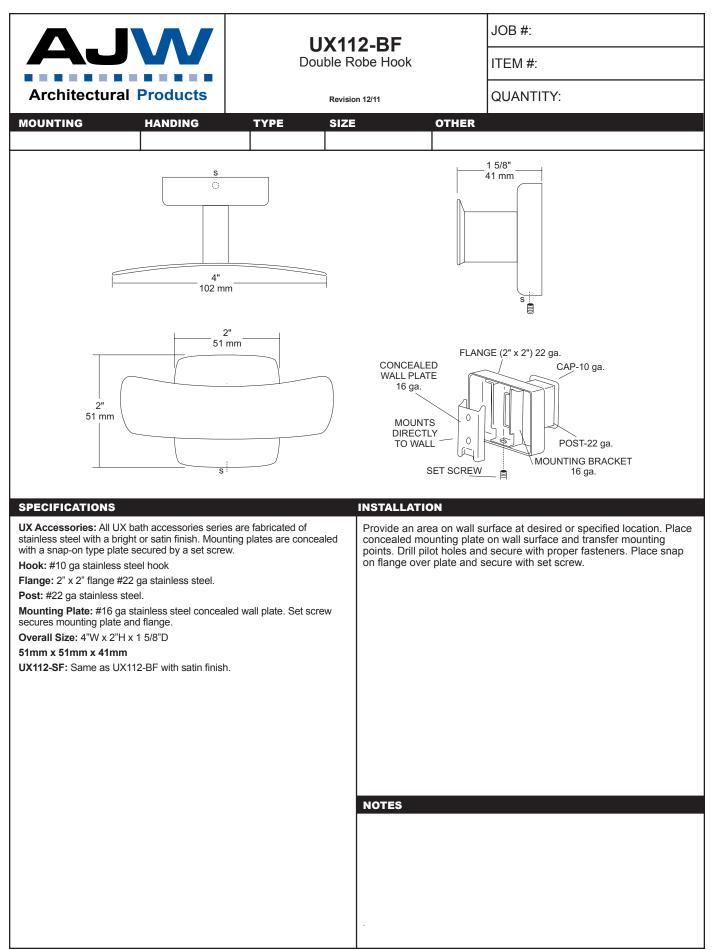

Standard Lengths (Other sizes available upon request): 30" x 16", 30" x 18", 36" x 18", 36" x 24", 42" x 36", 54" x 36"

SPECIFICATIONS

Bacteria & Mildew Resistant: Heavy duty vinyl film (8 mil) that is flame retardant, durable and waterproof. Microbiotic KV-33 is an integral part added to the fabrication of this curtain that can be laundered repeatedly without losing this barrier against bacteria, fungus and mildew. KV-33 is a durable bacteriostat, mildewstat and fungistat that will provide protection for as long as you use this style curtain. It will retard the growth of organisms, thereby inhibiting odors caused by decaying bacteria.

Design: To insure the ultimate in bacteria free curtain, there are no side hems to hinder the flow-off of soap and water. This also makes cleaning easier. The heading is reinforced with a ten gauge vinyl film with rust proof anodized eyelets spaced 6" apart.

Cleaning: Sponge with warm mild soap and rinse with clear water.

Machine washing: Relatively cool water temp not to exceed 120 degrees F. DO NOT USE DETERGENTS. Air dry at low temp. Colors: Standard stock color is white. Special order for other colors are available on request.

*UX1-V/UX2-V: Overhead s/s supports for oversized shower rods. (For shower rods over 72" in length an overhead support is recommended)

UX1-V: 1" OD shower rods.

UX2-V: 1 1/4" OD shower rods.

INSTALLATION

Recommended: UX169 stainless steel shower curtain hooks to connect to AJW shower curtain rods. Various types of flanges are available to secure rod and curtain to mounting surface (exposed and concealed).

Measuring Curtains: Curtains are measured W x H. The same curtain will fit a 1 or 1 1/4" diameter rod.
