U711Installation Instruction Sheet

INSTALLATION

Coordinate installation with architect / contractor for specific mounting location and height for each mirror application. Making sure "I" bracket is level, transfer all mounting point locations to wall surface from drawing. Secure brackets with proper fasteners for each application. Slide mirror down over horizontal brackets until clip lock secures mirror in place. Mirror can only be removed by inserting tool through hole at bottom of frame depressing clip. This will allow mirror to slide up over brackets. Fillers are available if mirrors are mounted above and below tile line. (U004 Filler) Filler material will match mirror frame to form a one piece construction.

To meet ADA Code, bottom edge of reflective surface can be no higher than 40" above finished floor. (4.19.6) Full length mirrors may be used for universal application when installed in correct locations.

CARE & CLEANING

Wipe mirrors with a soft cloth, taking special care to rub stainless steel frames with the grain to avoid scratching. Do not use abrasive cleaners containing chloric solutions on stainless steel frames. Glass Plus or other window cleaning products are ideal.

UB13Chrome Hat & Coat Hook

SPECIFICATIONS INSTALLATION

UB Accessories: Fabricated of forged brass with a nickel and copper plating of chrome coating. In compliance with all standard commercial and government standards.

Overall Size: 1 3/16"W x 2 1/4"H x 2 7/8"D

30mm x 57mm x 70mm

Place hook on mounting surface and transfer mounting points. Drill pilot holes and secure with proper fasteners per each application.

SPECIFICATIONS INSTALLATION

UB Accessories: Fabricated of chrome plated, solid forged brass with a nickel and copper plating. In compliance with all standard commercial and government standards. Hard rubber bumper prevents damage to interior walls as well as door ways.

Overall Size: 1 5/8"W x 2 1/8"H x 3"D

41mm x 54mm x 76mm

Place hook on mounting surface and transfer mounting point locations. Drill pilot holes and secure with proper fasteners per application.

SPECIFICATIONS & INSTALLATION

FLANGE INFORMATION

Tubing: Fabricated of #18 ga stainless steel with a #4 satin finish. Available in 1 1/4" outside diameter. All bends are formed by an automatic mandrel bending process. All bars maintain a constant 1 1/2" offset.

Finish: Standard finish is a #4 satin finish. For a non-slip finish (peened) add suffix X to model number. (Ex. UG2X-A)

Flanges: Snap flanges are fabricated of 3" diameter, 3/8" deep drawn #22 ga stainless steel with #4 satin finish to match tubing. Flanges have dimples that secure over mounting plate.

Strength: Bars with a 1 1/2" offset clearance will support loads in excess of 900lbs when properly installed. Bars with greater offsets will support loads up to 250lbs when properly installed.

Installation: Before installing grab bars, verify with all state and local codes for requirements on bar diameter and type finish. Recommended mounting heights for grab bars are 33" - 36" centerline above finished floor. All mounting of grab bars when possible should have in wall mounting back plates. Find centerline mounting points and place bar on line making sure to be on center. Transfer mounting points (3 per flange) to wall. Drill pilot holes and secure bar with proper anchors per application. Snap cover over mounting plate.

Standard Lengths (Other sizes available upon request): 12", 16", 18", 24", 30", 32", 36", 42", 48", 50", 52", 54", 56"

SPECIFICATIONS & INSTALLATION

Tubing: Fabricated of #18 ga stainless steel with a #4 satin finish. Available in 1 1/4" outside diameter. All bends are formed by an automatic mandrel bending process. All bars maintain a constant 1 1/2" offset.

Finish: Standard finish is a #4 satin finish. For a non-slip finish (peened) add suffix X to model number. (Ex. UG20X-G)

Flange: Flanges are fabricated of 3" diameter, 1/2" drawn #11 ga stainless steel with #4 satin finish to match tubing. Flanges are heliarc welded to bar to form a one piece construction. Each flange is secured to concealed mounting plate with four (4) 1/4"-20 stainless steel tamper resistant set

Strength: Bars with a 1 1/2" offset clearance will support loads in excess of 900lbs when properly installed. Bars with greater offsets will support loads up to 250lbs when properly installed.

Installation: Before installing grab bars, verify with all state and local codes for requirements on bar diameter and type finish. Recommended mounting heights for grab bars are 33" - 36" centerline above finished floor. All mounting of grab bars when possible should have in wall mounting back plates. Secure mounting plate to wall surface at specified location with proper anchors (snugly) until proper centerline dimension is achieved. Place bar over plates and secure with supplied set screws. (4 per flange).

Standard Lengths (Other sizes available upon request): $30" \times 16"$, 30"x 18", 36" x 18", 36" x 24", 42" x 36", 54" x 36"

SPECIFICATIONS

Shelf: Fabricated of #18 ga stainless steel with a #4 satin finish, 8" deep (203mm) bent down 1 1/2" with 1/2" returns back for rigidity and safety.

Back: Fabricated of #18 ga stainless steel, #4 satin finish. Lower portion has a formed channel for added rigidity to support the mop holders.

Mop Holders: UJ19 plated reinforced steel with serrated cam type hard rubber mop or broom holder. Holds handles 1/2" to 1 1/4" diameter.

Hooks: #14 ga stainless steel with a #4 satin finish.

Mounting Brackets: #16 ga stainless steel with exposed mounting points.

Verify Style:

UJ45A: 34"L (864mm) with 3 holders, 4 hooks. **UJ45B:** 44"L (1118mm) with 4 holders, 5 hooks. **UJ45C:** 54"L (1372mm) with 5 holders, 6 hooks.

Place unit to wall surface making sure unit is level and transfer mounting points. Drill pilot holes and secure unit with proper fasteners per application.
