

Care, Cleaning, and Maintenance Instructions - Solid Plastic Partitions

Routine cleaning of dirt and grime should be performed with a soft wet cloth. Stubborn dirt and grease can be removed by using any non-abrasive household cleaning agent.

Graffiti can be removed by using an industrial graffiti remover. It is best to test a small subtle area before applying an industrial graffiti remover, as some cleaners can harm your plastic surface.

Mineral spirits or acetone may be used to remove any masking residue that may have adhered to the product after installation.

Do not use any form of abrasive cleaners or pads on your solid plastic toilet partitions. These products will leave scratch marks and will remove the sheen from the surface.

Regularly tighten any fasteners that may have become loose as a result of vibrations, vandalism, or misuse.

Most cuts and scratches can be repaired by burnishing the affected surface with a smooth round object, such as a spoon, or the rounded edges of a screwdriver handle. While utilizing the rounded edge of the tool, apply pressure to the cut or scratched surface to heal the plastic.

After cleaning, silicone can be applied to the plastic surface to brighten the finish.
